

Active air purification device that directly supplies purified air to user's nose

- Neck wearing style with Ergonomics design
 - combined anion function with replaceable HEPA filter
 - Equipped with high-capacity (2600mAh) Li-ion battery of Samsung SDI
 - Available for usb charging from laptop or pc and cars
- The main user : Car driver, office workers, student...etc

(special feature)

Triple multi filter :
Midium-carbon-HEPA
(Grade:h12)

Mounting anion
generator module

button for air-purifying
selection mode

Display with LED :
operating status
and the battery status

A wearable air purifier with an advanced concept of direct purifying system

ADVANTAGE . 1

Wearable Air Purifier
which is easy to carry on.

Wearable device, which is possible to remove the contaminants such as dust, pollens etc. anywhere by wearing it on the neck.
(suitable for various users such as office, subway, car-driver etc.)

ADVANTAGE . 2

A simple recharging type

Available to charge and use by applying large capacity lithium-ion battery with USB charging method.

ADVANTAGE . 3

A fashion item
with a sensational design

It has both esthetic and functional feature by satisfying everyone regardless of gender with sensible design which make it easy to wear on.

ADVANTAGE . 4

Easily replace HEPA Filter

Easy to replace the filter cartridge through filter replacing part on the bottom of the products.
(recommendable filter replacement period: 3~4 months)

MADE IN KOREA

This Wearable Air Purifier creates a luxurious and item for fashionist.

● **Wearable method with Neck Band Style**

Comfortable wearability with Neck Band Style and wearable design with various colors as Black & White basic

Wearable technology dominating the space!

Wearable Technology with overcoming the limitations of Air Purifiers.

● **Product function**

WEARABLE AIR PURIFIER

01. By applying HEPA filter, inhale the contaminated air and supply clean air.
02. By Secondary generating negative-ion, it removes the residual contaminants and directly supplies purified air.
03. With effectively removing the harmful elements for human body, it is an active air purifying device which directly supplies purified air to end-user's nose.

Black basic colors

White basic colors

● **Product Details**

- Size : 250*55*270mm
- Weight : 230g
- Battery: 2,600mA rechargeable lithium-ion battery
- Wind volume : 50m/h
- Negative-ion generation rate : 1.5million/10cm
- Charging time: DC5V/1A (about 4 hours)
- Power consumption : 1W
- Operating time:
 - 1Stage(negative-ion) - approx. 26 hours.
 - 2Stage(negative-ion & airpurifying mode) - approx. 13hours.
- Origin: KOREA
- Product classification : Portable Air Purifier

A wearable air purifier with an advanced concept overcame the limitations of existing air cleaning function.

- SETP1. Anion eliminates the contaminants
- SETP2. Air cleaning through HEPA filter and eliminating residential pollutants through Anion generator
